#### INTERNATIONAL SEARCH REPORT

Information on patent family members

International application No. PCT/AU2005/000045

This Annex lists the known "A" publication level patent family members relating to the patent documents cited in the above-mentioned international search report. The Australian Patent Office is in no way liable for these particulars which are merely given for the purpose of information.

Pater	nt Document Cited in Search Report				Pate	ent Family Member

# INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/AU2005/000045

Box No. I Basis of the report						
1. With regard to the language, this report is based on:						
X The international application in the language in which it was filed						
A translation of the international application into , which is translation furnished for the purposes of:	s the language of a					
international search (under Rules 12.3(a) and 23.1 (b))						
publication of the international application (under Rule 12.4(a))						
international preliminary examination (Rules 55.2(a) and/or 55.3(a))						
2. With regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):						
the international application as originally filed/furnished						
the description:						
pages as originally filed/furnished	•					
pages* received by this Authority on with the letter of						
pages* received by this Authority on with the letter of						
the claims:						
pages as originally filed/furnished						
pages* as amended (together with any statement) under Article 19	•					
pages* received by this Authority on with the letter of	•					
pages* received by this Authority on with the letter of the drawings:	•					
pages as originally filed/furnished  pages* received by this Authority on with the letter of						
pages* received by this Authority on with the letter of pages* received by this Authority on with the letter of	•					
a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.						
3. The amendments have resulted in the cancellation of:						
the description, pages	•					
the claims, Nos.	•					
the drawings, sheets/figs	į.					
the sequence listing (specify):						
any table(s) related to the sequence listing (specify):						
4. This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).						
the description, pages						
the claims, Nos.						
the drawings, sheets/figs						
the sequence listing (specify):	•					
	•					
any table(s) related to the sequence listing (specify):	•					
* If item 4 applies, some or all of those sheets may be marked "superseded."	:					

#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. **PCT/AU2005/000045** 

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Stat	tement		,
·	Novelty (N)	Claims 1-26	YES
		Claims	NO
	Inventive step (IS)	Claims 1-26	YES
		Claims .	NO
	Industrial applicability (IA)	Claims 1-26	YES
		Claims	NO ·

2. Citations and explanations (Rule 70.7)

D1 WO 2003/024978

D2 Soo-Young Kim. et al. Angew. Chem. Int. Ed. 2001, 40, No 11, pages 2119-2121.

D3 Dongmok Whang, et al. Agnew. Chem.. Int Ed 1998, 37, No 1/2, pages 78-80.

#### Explanations:

D1 represents the closest prior art and it discloses singular nuclear platinum complexes encased in a cucurbit[n]uril (CB[n]), where n is 4 to 20. These compounds are used as pharmaceuticals and in particular as anticancer agents. There is no suggestion of multinuclear metal complexes encapsulated in a CB nor is there any suggestion that to do so would reduce the toxicity of these complexes.

D2 discloses a CB[8] which encapsulates a singular nuclear copper complex. The citation does not exemplify a use only suggests that the compounds were rare in the prior art and that they would be potentially useful as catalysts.

D3 This document discloses a lidded or bottomed CB where the CB has one end blocked by a Cesium complex. The addition of the cesium lid improves the solubility in water and still allows a large enough space inside the CB for a guest ion or molecule. The only molecule exemplified as a guest is THF, however potential applications for the lidded CB mentioned include separations, catalysts, sensors, and drug delivery. No multi nuclear metal complexes are mentioned or implied.

It is considered that claims 1-26 are novel and possess an inventive step over the prior art. Claims 1-26 also have Industrial Applicability.
